

STATION DROPS

SINGLE AND DOUBLE OUTLET DROPS

DESCRIPTION

The Harris Products Group offers OSHA compliant single and dual station drops to safely deliver gas from central piping systems to welding and oxy-fuel work stations. Single station drops are plumbed for a second outlet if expansion is ever needed. Oxy-fuel drops have internal check valves to meet OSHA and NFPA requirements. All models come with gas specific CGA connections as well as hard cap and chain to keep passages free of dust and contamination. Remove the plug on the bottom drip leg to remove moisture from the gas line.

DETAILS
