DATASMART™ FOR HEALTHCARE FACILITIES

The HARRIS Model 763 DataSmart is a fully-automatic, electronically controlled gas switchover system that meets the requirements of NFPA-99. The Datasmart can provide continuous supply of gas from a variety of sources including high pressure cylinders, liquid cylinders or bulk gas containers. DataSmart includes a built-in WiFi-based telemetry system that allows the user to view and manage all aspects of the gas system. It is ideal for healthcare facilities. The on-board software ensures optimal gas use and savings especially from liquid cylinders and can greatly reduce or eliminate venting and residual gas return.
