

The Value of Pro-Pak

Robotic Welding Systems

The Pro-Pak® family of pre-engineered robotic welding systems from Lincoln Electric Automation™ enhance part production by helping to improve productivity, quality, and safety. Pro-Pak systems are the solution for high-volume welding automation or a new standard addition to your production process.

Grow or Scale Your Business

The Pro-Pak systems help you grow your business with their wide range of manufacturing capabilities and system flexibility. Pro-Pak systems help increase production rates and lower reject rates thanks to program repeatability

Industry-Leading Service & Expertise

Known as The Welding Experts® for over 125 years, Lincoln Electric Automation provides a full circle of design, product delivery, and customer service with the Pro-Pak family.

PLC & HMI

Pro-Pak systems are equipped with Allen Bradley® Safety PLC and HMI. Large PLC memory allows for use in high-volume production environments where tool changeover is required. HMI touch screen is set up with standard maintenance and user screens.

Fast Lead Time with Standard Programming

Select models are available for immediate shipment from inventory. Standard system programming allows for quick integration of customer tooling.

Capital Equipment Options

Pro-Pak systems easily integrate with major robot manufacturers including FANUC®, ABB®, Yaskawa®, and Kuka®.

Safety

Each Lincoln Electric Automation site is A3 robot integrator certified. We deliver robotic products and services that are safe, reliable, and of good quality.

CUSTOMER ASSISTANCE POLICY

The business of Lincoln Electric is manufacturing and selling high quality welding equipment, automated welding systems, consumables, and cutting equipment. Our challenge is to meet the needs of our customers, who are experts in their fields, and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or technical information about their use of our products. Our employees respond to inquiries to the best of their ability based on information and specifications provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment, or to provide engineering advice in relation to a specific situation or application. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or communications. Moreover, the provision of such information or technical information does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or technical information, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose or any other equivalent or similar warranty is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the definition of specifications, and the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
