

The Value of SR™ 760

Single Rail | Automated Fabrication System

At Lincoln Electric Automation, we are constantly innovating to increase the quality, efficiency, and reliability of our robotic systems. The Zeman systems provide a solution that allows fabricators to automate the welding processes with the smallest possible footprint. Let's review the benefits of the SR 760 system!

Easy Operation

Intuitive controls and automated workflow generation simplify operation. These features reduce the need for extensive training and allow for seamless integration into existing fabrication processes.

Economic Investment

The SR 760 system helps reduce labor costs and downtime through its single-operator design, three-stage upgradeability, and minimal maintenance requirements.

Space Efficiency

The system's compact footprint and integrated profile-turning devices are ideal for facilities with limited space while maintaining high throughput.

Safety Assurance

The system's remote monitoring capabilities and built-in safety features mitigate risks associated with manual weld processes.

Welding Quality

The system helps deliver reliable results while minimizing rework and scrap by automating welding processes and full-dimensional quality checks.

Automated Handling

The SR 760 system automates repetitive tasks, allowing fabricators to focus on more manual tasks. This delegation helps enhance workflow efficiency.

CUSTOMER ASSISTANCE POLICY

The business of Lincoln Electric is manufacturing and selling high quality welding equipment, automated welding systems, consumables, and cutting equipment. Our challenge is to meet the needs of our customers, who are experts in their fields, and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or technical information about their use of our products. Our employees respond to inquiries to the best of their ability based on information and specifications provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment, or to provide engineering advice in relation to a specific situation or application. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or communications. Moreover, the provision of such information or technical information does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or technical information, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose or any other equivalent or similar warranty is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the definition of specifications, and the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
