

HARRIS EQUIPMENT FEATURES AND BENEFITS

HARRIS HAND TORCHES

Trigger torches are aluminum cast body – not plastic

All Harris hand torches:

Piston regulator in all torches-means consistent gas pressure – regardless of the torch position-can invert the torch without sputtering or spitting

Manufactured in the USA

Adjustable swirl combustion flame

INFERNO® AIR FUEL TORCHES

Design

Uniquely designed insert results in consistent, hotter swirl combustion flame that wraps around the work piece for maximum efficiency

USA Manufacturing process

Holds tolerances for Inferno tips, which means optimal mix of air and fuel resulting in the perfect flame – every time.

Quality control

Each tip is tested twice before it leaves the factory

PORT-A-TORCH® OXY FUEL KITS

Cost benefit – Handle, Mixer, Tip are separate. Tips are the part that fail most often. Customer does not have to replace the mixer also.

Manufacturing capabilities – Hold the tolerances on the design – Any piece of grit, or metal shaving gets into the tip can cause problems - 100% flame tested, not batch tested

HARRIS REGULATORS - most regulators fail due to seat contamination. Harris manufactures an encapsulated seat with a 10 micron filter to protect the valve seat in ALL Harris regulators

GAS REGULATORS

Experience -100 years' experience manufacturing industrial regulators

Encapsulated seat – most regulators fail due to seat contamination. Harris manufactures an encapsulated seat with a 10 micron filter to protect the valve seat in ALL Harris regulators

7 year warranty – because of the encapsulated seat we are able to offer a 7 year warranty
