The Lincoln Electric Company 22801 St. Clair Avenue Cleveland Ohio 44117-1199

## **CERTIFICATE OF CONFORMANCE**

Electrode:Innershield® NR®-232Electrode Size.068" (1.7 mm)Specification:AWS D1.8:2016Date:March 01, 2022

This is to certify that the above listed product was manufactured to meet the Class T4 requirement of AWS A5.01 as required by clause 6.3.1.2 of AWS D1.8:2016.

It was manufactured and supplied according to a Quality System Program that meets the requirements of ISO9001 among others as documented on The Lincoln Electric web page (<<u>http://www.lincolnelectric.com/en-us/company/Pages/certifications.aspx></u>).

| Operating Settings                     | High Heat Input<br>Requirements | Low Heat Input<br>Requirements | High Heat Input<br>Results | Low Heat Input<br>Results  |
|--|---------------------------------|--------------------------------|----------------------------|----------------------------|

| Elongation %                           | 22 min.                         | 22 min.                        | 27                         | 27                         |
| Average Impact Energy                  | (40 min.)                       | (40 min.)                      | 63 (46)                    | 65 (48)                    |
| Joules @ -18 °C (ft-lbs @ 0 °F)        |                                 |                                | 59,63,65 (44,47,48)        | 62,64,67 (46,47,50)        |

1. This document meets the requirements of AWS A5.01M/A5.01 Schedule F. When a specific lot number is referenced it also meets the requirements of EN10204, type 2.2. It does not meet the requirements of type 3.1.

2. This product satisfies the requirements of AWS D1.8:2016, Annex E, after exposure for 1 week at 80°F / 80% relative humidity.

3. The Charpy V-notch impact values reported at -18 °C (0 °F) are required when the Lowest Anticipated Service Temperature (LAST) is -29 °C (-20 °F).

- 4. Lot testing exemption as defined in AWS D1.8/D1.8M: 6.3.3 by testing a minimum of 3 lots for approval has been completed. For further questions please contact customer service. https://www.lincolnelectric.com/en/Ask-the-Experts/Contact-Us
- 5. The strength and elongation properties reported here were obtained from tensile specimens artificially aged at 105°C (220°F) for 48 hours.
- 6. Strength values in SI units are reported to the nearest 10 MPa converted from actual data. Preheat and interpass temperature values in SI units are reported to the nearest 5 degrees.
