

Material Handling

About Us

Fori® Automation, LLC A Lincoln Electric Company specializes in the custom design, build and integration of automated material handling, assembly, testing and welding systems for the automotive and non-automotive industries. With over 125 years of experience and locations across five continents, we are positioned to support our customers around the globe.

Design

Standard and custom material handling equipment with integrated safety and accurate guidance ensures a safe and reliable material handling solution.

Build

Fori material handling equipment utilizes high-quality materials and industry leading ready made components.

Integration

Our service team is dedicated to equipment startup and support ensuring a quick and smooth installation.
