

The Value of SPS™

Plate Inspection Quality Control System

At Lincoln Electric® , we are constantly developing to meet the needs of our customers. Together with Zeman™, we specifically designed the SPS™ for workshops with limited space to facilitate the part management of steel fabricators and service centers globally. Let's explore the benefits of the SPS system.

Economic Investment

Sorting and checking every part by hand is complex, time-consuming, and cost-intensive. Replace manual sorting with the SPS to help save time and labor costs.

Health and Safety

The SPS system's comprehensive safety features help mitigate potential hazards inherent with human operations.

Quality Control

The SPS system accurately inspects, sorts, and adheres to the quality standards you set.

Easy Operation

The intuitive software interfaces, automated processes, and user-friendly controls streamline the workflow, reduce training requirements, and require only one operator.

Efficient

The system's consistent dependability, top-notch scanning and efficient handling helps minimize downtime and uninterrupted operations.

Automated Sorting

Revolutionize your workflow with the system's automated tasks, optimizing productivity and reducing errors through seamless automation.

CUSTOMER ASSISTANCE POLICY

The business of Lincoln Electric is manufacturing and selling high quality welding equipment, automated welding systems, consumables, and cutting equipment. Our challenge is to meet the needs of our customers, who are experts in their fields, and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or technical information about their use of our products. Our employees respond to inquiries to the best of their ability based on information and specifications provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment, or to provide engineering advice in relation to a specific situation or application. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or communications. Moreover, the provision of such information or technical information does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or technical information, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose or any other equivalent or similar warranty is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the definition of specifications, and the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
