

Lincoln Electric UK will be attending the MACH2022 exhibition at the Birmingham NEC from the 4-8th April 2022.

Come along and visit us on stand number 17-304 where we will be exhibiting our latest welding solutions alongside manufacturers of steel beam cutting, assembly and welding machines, Zeman Bauelemente, who became part of the Lincoln Electric group in 2021.

We will also be showcasing our automated cutting equipment on stand No. 17-309, with our Partner Distributor and manufacturer of bespoke, high power CNC cutting machines, Kerf Developments Ltd.

Furthermore, our Lincoln Electric VRTEX virtual welding equipment will be on stand 17-32 in the Education Hall where visitors can have a go at virtual welding & cutting and learn more about our complete welding education solutions.

We are looking forward to seeing you there. If you would like to arrange a meeting at either stand, please get in touch with us at:
