New Pricing on Pipeline Engine Driven Welders

CROSS COUNTRY® 300

Choose the Cross Country 300 welder for a reliable, multi-process machine offering engineered DC welding output to deliver optimized puddle performance on root, fill, and cap passes all in a compact size and reduced weight.

K4166-1	Cross Country 300 (Kubota®)
K4166-2	Cross Country 300 with Wireless Remote (Kubota)
K4166-3	Cross Country 300 with Stainless Steel and Wireless Remote (Kubota)
K4166-7	Cross Country 300 One-Pak® (Kubota)

SAE® -300

Pick the SAE-300 welder for a rugged design with pure DC generated welding output and two continuous control dials to precisely set both voltage and current to maintain superior control over the arc.

K4089-1	SAE-300 MP (Perkins®)
K4090-1	SAE-300 MP (Kubota)
K4090-2	SAE-300 MP with Wireless Remote (Kubota)
K4089-2	SAE-300 MP with Stainless Steel and Wireless Remote (Perkins)
K3202-1	SAE-300 HE (Perkins)

CLASSIC® 300

Select the Classic 300 welder for a more traditional machine featuring pure DC generated welding output with a 5-step output control to offer a smooth and stable arc for the operator to help overcome the unpredictable variables in pipeline welding.

K4263-1	Classic 300 MP (Perkins)
K4264-1	Classic 300 MP (Kubota)
K3198-1	Classic 300 HE (Kubota)
