

# The Value of Cooper Welding Cobots

## Collaborative Robotic Systems

Do you have trouble finding qualified welders?  
Do you need to implement automation to stay competitive?

Lincoln Electric Automation has an affordable, game-changing solution with Cooper™ welding cobots!

### Easy-to-Use Programming

The Cooper App is specifically designed for Cooper cobot programming. Its user-friendly interface helps remove the barriers to robotic welding common with traditional teach pendant interfaces.

### Adaptable Integration

With no cell fencing required, less floor space is needed to manufacture a part using a cobot. Sleek cable management helps reduce payload errors and improve workflows.

### Thoughtful Cart Design

Cobot cart operation is enhanced with a tooling table top, sliding doors for easy access to in-cart equipment, and mounting provisions for adding a robotic torch maintenance center.

### Cost-Effective Solution

Cooper cobot systems have lower maintenance costs and require less power input compared to larger robotic welding systems.

### Industry-Leading Welding Expertise

With over 125 years of welding industry experience, you can trust The Welding Experts® at Lincoln Electric Automation to provide a state-of-the-art robotic welding system. Our cobot technical support team is available for any post-purchase questions.

### Complete Lincoln Electric System

Cooper cobot systems include the Power Wave® R450 robotic welding machine, AutoDrive® wire feeder, Magnum® PRO wire-break weld torch, the Cooper App, and more. Lincoln Electric Automation is your single-source provider.

#### CUSTOMER ASSISTANCE POLICY

The business of Lincoln Electric is manufacturing and selling high quality welding equipment, automated welding systems, consumables, and cutting equipment. Our challenge is to meet the needs of our customers, who are experts in their fields, and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or technical information about their use of our products. Our employees respond to inquiries to the best of their ability based on information and specifications provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment, or to provide engineering advice in relation to a specific situation or application. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or communications. Moreover, the provision of such information or technical information does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or technical information, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose or any other equivalent or similar warranty is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the definition of specifications, and the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
