

FLUXOFIL 464M

TOP FEATURES

- FLUXOFIL 464M is rutile seamless copper coated flux cored wire for welding of steel with Re up to 460MPa and meets impact requirements at -40°C
- The wire is characterized by reduced emission of welding fumes.
- Excellent operator appeal due to new flux formulation and exceptional arc stability.
- Very good performance in vertical up welding, including root passing on ceramic backing.

TEST RESULTS

Test results for mechanical properties, deposit or electrode composition and diffusible hydrogen levels were obtained from a weld produced and tested according to prescribed standards, and should not be assumed to be the expected results in a particular application or weldment. Actual results will vary depending on many factors, including, but not limited to, weld procedure, plate chemistry and temperature, weldment design and fabrication methods. Users are cautioned to confirm by qualification testing, or other appropriate means, the suitability of any welding consumable and procedure before use in the intended application
