

LNS 133TB

TOP FEATURES

- High Manganese and microalloying elements to optimize impact toughness in 2-run technique at low temperature.
- Molybdenum free composition to limit the secondary hardening phenomena.
- Suitable for pipe grade up to X90.

TEST RESULTS

Test results for mechanical properties, deposit or electrode composition and diffusible hydrogen levels were obtained from a weld produced and tested according to prescribed standards, and should not be assumed to be the expected results in a particular application or weldment. Actual results will vary depending on many factors, including, but not limited to, weld procedure, plate chemistry and temperature, weldment design and fabrication methods. Users are cautioned to confirm by qualification testing, or other appropriate means, the suitability of any welding consumable and procedure before use in the intended application.
