

Choosing the Right Wireless Remote for Your Engine-Driven Welder

Questions to Ask

- **Which machine are you using?** Choose a remote that matches your machine model.
- **What is the required range for the remote?** Do you need a shorter range (350 feet) or a longer range (800 feet)?
- **Do you need advanced features like process control or memory recall?** These are only available with the Ranger® and Frontier® remotes.
- **What type of batteries do you prefer?** Rechargeable (Ranger/Frontier) or AA batteries (CoreLinc)?
- **Will the remote need to be shared between multiple machines?** The CoreLinc™ can be easily moved between machines without tools, while others may require tools for installation and removal.

*Lincoln Electric wireless remotes are designed to work at a low frequency (915 MHz), allowing them to work through obstacles, giving them an advantage over other remotes.

The operation of welding fume control equipment is affected by various factors including proper use and positioning of the equipment, maintenance of the equipment and the specific welding procedure and application involved. Worker exposure level should be checked upon installation and periodically thereafter to be certain it is within applicable OSHA PEL and ACGIH TLV limits.

CUSTOMER ASSISTANCE POLICY

The business of Lincoln Electric is manufacturing and selling high quality welding equipment, automated welding systems, consumables, and cutting equipment. Our challenge is to meet the needs of our customers, who are experts in their fields, and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or technical information about their use of our products. Our employees respond to inquiries to the best of their ability based on information and specifications provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment, or to provide engineering advice in relation to a specific situation. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or communications. Moreover, the provision of such information or technical information does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or technical information, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose or any other equivalent or similar warranty is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the definition of specifications, and the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
