## CHECK VALVE KIT

Improves shutdown when the air compressor outlet valve is occasionally left open:

- Eliminates air pressure back-flow from an external air hose and/or a receiver tank into the compressor system. (See VMAC Operator's Manual).
- Ensures proper discharge of the compressed air.

## **Additional Features and Benefits:**

- Easy installation to the compressor outlet valve – no sheetmetal sides to remove or internal connections to break.
- External installation provides a visual confirmation that the check valve has been added.
- Fits all Air Vantage® products from Lincoln Electric.

## CUSTOMER ASSISTANCE POLICY

The business of The Lincoln Electric Company is manufacturing and selling high quality welding equipment, consumables, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or advice about their use of our products. Our employees respond to inquiries to the best of their ability based on information provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or advice. Moreover, the provision of such information or advice does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or advice, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
