

Arc Products™

Automated Welding Solutions

Arc Products™ has designed and manufactured automated welding equipment focused on fixed automation and orbital TIG, since 1980. Located in San Diego, California, the company engineers and manufactures standard and custom automation systems from simple to complex applications. Our rugged equipment incorporates the latest and proven technologies providing a high-quality and consistent product with an outstanding level of service and support.

Seam Tracker™

The ultra-rugged, microprocessor-based STC-301 system keeps the welding torch exactly on track, regardless of variation in the weld joint.

Arc Voltage Control

AVC-5 System regulates arc length for convenient, flexible control of all welding conditions.

TIG Wire Feed

DWF-4 Wire Feeder automatically delivers TIG and plasma filler wire to the welding arc. The system is extremely accurate.

Magnetic Arc Control

Precisely position, weave or stabilize the arc in any pattern required. Perfect for thick-to-join material, wide weld joints, and high-speed TIG welding.

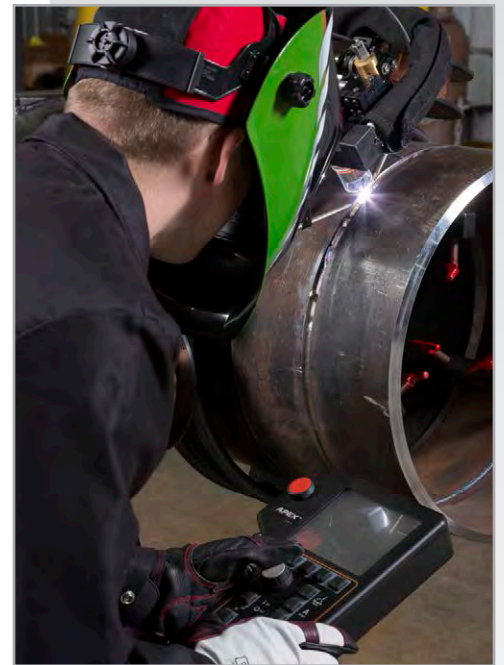

APEX™ 2100 Orbital Welding System

A modular system incorporating all the components required for orbital TIG welding for a pipe diameter of 6 in. or greater.

- ▶ In 2011, Arc Products™ was acquired by Lincoln Electric, the global leader in the design, development and manufacture of arc welding products, robotic arc welding systems, plasma and oxyfuel cutting equipment.
