

HEAD PRESSURE KIT

The Harris Model 701 Head Pressure Kit (#4400573) is designed to use an inert compressed gas such as argon or nitrogen to push butane or propane used as a solvent for the cannabis oil (BHO/PHO) extraction process. All components are cleaned for food/chemical grade gases and designed to minimize contaminants into the extraction process.

Caution: butane and propane used in various cannabis extraction processes are extremely flammable. This head pressure kit must only be used by trained professionals.

FEATURES

- Model 701-125-580 High Purity Regulator
- 8 Ft. PTFE lined hose
- Compact elbow connection to clear butane cylinder shroud
- Integral check valve to prevent dangerous reverse flow of gas
