Invertec® V205-T AC/DC

Smart switching, full flexibility

The Invertec® V205-T AC/DC is ideal for critical AC or DC TIG welding applications. This full featured TIG welder is also capable of stick welding. Equipped with Power Factor Correction (PFC) Invertec® V205-T AC/DC provides almost 30% more output power with the same input current. The 115/230V auto-reconnect makes the V205-T AC/DC truly flexible and the rugged, portable, lightweight design is ideal for shop or field environments. It can be simply changed to a water cooled unit by adding the COOL ARC® 20 Water Cooler.

Features

- Advanced inverter technology optimizes arc performance in a light-weight package.
- Suitable for 115-230V (+15%-10%) single phase use smart switching.
- 30% more output current with the same input current allows welding up to 4.0 mm electrode with 16A input.
- Three modes of operation DC TIG, AC TIG or Stick.
- AC or DC output for a wide variety of material types and thicknesses.
- Adjustable AC frequency allows you to focus the arc for precise arc control.
- PFC gives low current consumption, energy saving, low current harmonics and reduction of the total CO₂ produced by the welding process.
