

GENERAL AIR BY HARRIS

HEAD PRESSURE KIT

The Harris Model 701 head pressure kit is designed to use an inert compressed gas such as argon or nitrogen to push butane or propane used as a solvent for the cannabis oil (BHO/PHO) extraction process.

All components are cleaned for food/chemical grade gases and designed to minimize contaminants into the extraction process.

Caution: Butane and propane used in various cannabis extraction processes are extremely flammable. This head pressure kit must only be used by trained professionals.

FEATURES

- Model 701-125-580 High Purity Regulator
- 8 ft. PTFE lined hose
- Compact elbow connection to clear butane cylinder shroud
- Integral check valve to prevent dangerous reverse flow of gas
