

YOU'RE IN CONTROL

Wired Remotes for Engine-Driven Welders

Shown:
K4268-1

Shown:
K4330-1

KEY FEATURES

When your welding application takes you away from your welder, these heavy duty remote controls will give you the control you need to get the job done – and stand up to the conditions of your environment.

- Generous 125 ft. (38.1 m) cable.
- Detachable Control Box can be stowed in your truck or job box to deter job site theft.
- Customizable MIN/MAX Range is easy to set up in seconds. Precisely set the range you need for the job at hand.
- K4268-1 model includes a 115V duplex receptacle that can be used to power lights, grinders and other tools right where welding occurs.
