

LIGHTPRO SPARK PIEZOELECTRIC TORCH IGNITOR

LIGHTPRO
SPARK II

IGNITOR

DESCRIPTION

The LightPro Spark is a portable, hands-free piezoelectric ignitor for use in repetitive brazing and welding operations. When the lever is depressed the piezoelectric ignitor is engaged and a spark is created. It offers a faster and more reliable ignition source compared to typical hand held strikers and offers greater safety than alternate open flame pilot lights. The unit is battery powered and eliminates the need for an external power source.

DETAILS

Capacity: Medium duty

Housing: Zinc die cast

Where used: Brazing and welding operations

Weight: 0.43 lbs. / 0.20 kg.

FEATURES AND BENEFITS

- Replaces manual hand-held strikers
- Large metal flame shield helps prevent damage to unit during flame ignition.
- Magnets on the base allows attachment to steel surfaces in the work station.
- Safer and less expensive than an open pilot light*
- Shock proof metal housing
- Powered by two standard AA batteries (sold separately)
- Compact design – 2" x 3" x 4"
- Not recommended for use with high or multi-flame heating tips
