

WELD-PAK™ HD

Take a look around your home workshop and you'll find dozens of reasons to pick up this reliable, well-built Lincoln Electric welder. With four output ranges, the Weld-Pak HD is one of the most versatile machines in its class. We've included virtually everything you'll need to weld mild steel with gasless, flux-cored wire electrode – gun and cable assembly, work clamp and cable, welding handheld, chipping hammer/brush, even a spool of our self-shielded flux-cored wire.

Processes

Flux-Cored

Advantage Lincoln

- 35-88 amps output.
- Welds up to 1/8 in. mild steel.
- Plugs into household 115V, 20 amp outlet.
- Cold contactor safety feature keeps welding wire electrically “cold” until gun trigger is pressed.
- Compact, portable, lightweight and easy to use.
- Great for home repair and hobby projects on light gauge mild steel found around most households.
- With four output ranges, the Weld-Pak™ HD is versatile and yet easy to set proper welding procedures for even the novice user.
- Fan-cooled for long life expectancy.
- One year warranty on parts and labor. (90 days warranty on gun and cable).

Description

Base Unit Includes

- Welding gun and cable assembly.
- Work cable with work clamp.
- 1 lb. spool of .035" (0.9mm) Innershield® NR®-211-MP flux-cored wire.
- .035" contact tips – quantity 2.
- Welding handheld with #10 filter plate and clear glass cover plate.
- Chipping hammer/brush.

WELD-PAK HD	K2188-1	115/1/60	70A / 17V / 20%	20A	35-88A WFS while welding: 0-300 ipm Max. OCV: 29V	12.8 x 8.8 x 18 (325 x 224 x 457)	46 (20.9)

Weld-Pak HD Welding Capabilities

Metal To Weld	Process	Weld Appearance	Wire Electrode	Wire Dia.	Metal Thickness											
					24ga. .024"	22ga. .030"	20ga. .036"	18ga. .048"	14ga. .075"	12ga. .105"	1/8" .125"	10ga. .135"	3/16" .188"	1/4" .25"	5/16" .313"	3/8" .375"
Mild Steel	Self-Shielded Flux-Cored ⁽¹⁾	Good. Slag must be removed.	Innershield NR-211-MP	.035	SINGLE PASS											

⁽¹⁾ The use of the flux-cored process on thicker materials than recommended can result in welds of poor quality. The welds may appear to be fine, but may lack the fusion or bonding necessary to give a strong weld. This is called "cold casting" or "cold lapping" and is somewhat similar to a cold solder joint. Weld failure may result.

Customer Assistance Policy

The business of The Lincoln Electric Company is manufacturing and selling high quality welding equipment, consumables, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for advice or information about their use of our products. We respond to our customers based on the best information in our possession at that time. Lincoln Electric is not in a position to warrant or guarantee such advice, and assumes no liability, with respect to such information or advice. We expressly disclaim any warranty of any kind, including any warranty of fitness for any customer's particular purpose, with respect to such information or advice. As a matter of practical consideration, we also cannot assume any responsibility for updating or correcting any such information or advice once it has been given, nor does the provision of information or advice create, expand or alter any warranty with respect to the sale of our products.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying this type of fabrication methods and service requirements.
