#### **RECOMMENDED POWER SOURCES**

#### LN-25 PRO

The LN-25 PRO line is powered "Across-the Arc". This means that it uses the open circuit voltage of the power source to power the feeder and can run off of any power source with 15-110V DC avaiable at the studs. This gives excellent wire feeder poratbility because no control cable is needed. That means the LN-25 Pro machines will power off any machine that provides 15-110V DC at the studs.

The LN-25 PRO Dual Power wire feeder may also be powered through a control cable. Listed below are recommended power sources.

Flextec<sup>®</sup> Family
Ranger<sup>®</sup> Engine Driven Welders
Vantage<sup>®</sup> Engine Driven Welders
CV Family
Idealarc<sup>®</sup> DC Family
