

The Value of ClassMate Cobots

Collaborative Welding Robots For Education

Tackling the shortage in skilled trades has grown the need to automate in industry. Programming or operating a collaborative robot (cobot) can seem intimidating, but the Cooper™ App makes it as simple as Click Click Weld™. Let's explore the benefits the ClassMate Cobot systems can bring to students in your classroom!

Industrial Cobots

ClassMate Cobot systems are available with your choice of FANUC® or ABB® robot arm. Students will learn about robotics with brands commonly found in the industry.

Power Wave® R450

The industry-leading Power Wave R450 power source offers an extensive library of waveforms, which control welding arc length, reduce spatter, and change travel speeds. The Power Wave R450 can connect to single-phase or 3-phase power.

Smart Torch

Smart Torch design provides an ergonomic grip for users to easily move the collaborative robotic arm. The integrated buttons allow users to program from the torch.

Weld by Numbers

The Weld By Numbers™ feature offers preset weld settings. Dozens of parameters are preset in these numbers, which correlate to the material thickness to help optimize weld performance and quality.

Easy Programming

The innovative Cooper App provides an easy and intuitive interface that gets operators performing welds quickly. It accommodates for personal preference and customization of specific welds.

Mobile Cart Design

The slender, lightweight design offers flexibility and mobility for classrooms and labs; the standard tooling table top makes it easy to set up parts.

CUSTOMER ASSISTANCE POLICY

The business of Lincoln Electric is manufacturing and selling high quality welding equipment, automated welding systems, consumables, and cutting equipment. Our challenge is to meet the needs of our customers, who are experts in their fields, and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or technical information about their use of our products. Our employees respond to inquiries to the best of their ability based on information and specifications provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment, or to provide engineering advice in relation to a specific situation or application. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or communications. Moreover, the provision of such information or technical information does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or technical information, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose or any other equivalent or similar warranty is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the definition of specifications, and the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.
