

WHY REPAIR WHEN YOU CAN REPLACE?

**TRADE IN ANY BRAND
AND GET NEW HARRIS PRODUCTS**

**LONG-LASTING
QUALITY**

**INDUSTRY-LEADING
WARRANTY**

**A TRUSTED
BRAND**

A LINCOLN ELECTRIC COMPANY

BEYOND REPAIR TRADE-IN PROGRAM

GIVE YOUR CUSTOMERS A LONG-LASTING SOLUTION AND AVOID THE HASSLE OF REPAIRS!

The Harris trade-in program lets you give your customers an incentive to trade in their broken equipment. We provide our **premier distributors a 3% discount** on the industry's best and most-trusted products when your customers make the upgrade, then you can pass those savings onto your customer! And now, **instead of wasting time and money on yet another repair, your customers can get the best equipment available for more performance with less downtime.** On top of that, Harris will provide you **the support you need** to boost your business through this program.

GREAT CHANCE TO LET YOUR CUSTOMERS CHOOSE FROM SOME OF OUR MOST POPULAR PRODUCTS

25GX Industrial Regulator Model 145-540

The gold standard of industrial regulators: ergonomic, durable and proudly manufactured in America. And since every regulator is 100% tested every time, you don't have to worry about leakage or performance.

Flowmeter Regulator Model 355

With a one-piece, encapsulated seat design with an internal filter and PTFE Teflon® seat, this **durable-easy-to-read flow tube and cover** incorporates a regulator and flowmeter into one compact unit.

Hand-Cutting Torch Model 62-5

This is the industry standard by which all other cutting torch designs are compared, both less expensive to own and operate while also safer to use. The 62-5E uses acetylene and alternative fuels for heavy duty applications, and the 62-5F uses an injector mixer for low-cost fuel gases like propane, natural gas, MAPP® gas and propylene to produce **the hottest flame possible at the lowest gas pressure** (4 oz - 2 PSIG).

Hand-Cutting Torch Model 42-4

This lightweight cutting torch has all the features that made Harris famous, with a solid forged head, triangular tube design and Flash Guard® check valves. The 42-4E uses acetylene and alternative fuels, while the 42-4F with an injector mixer for low-cost fuel gases like propane, natural gas, MAPP® gas and propylene to produce the hottest flame possible at the lowest gas pressures (4 oz - 2 PSIG), making it **the safest, most efficient design in the industry.**

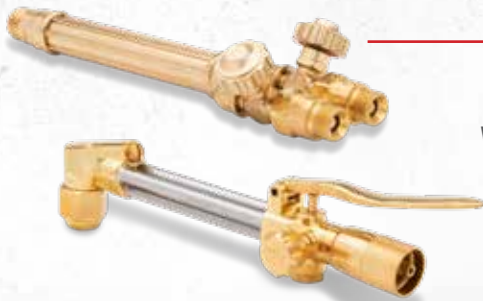

Flowmeter Regulator Model 351

Built smart and priced economically, this zero compensated flowmeter regulator features a compact design that is more resistant to both CO2 freeze-up and gauge damage than typical flow control devices. And, it **saves gas by operating at lower pressures** compared to other flowmeter regulators.

Compact General Purpose Regulator Model 801

This medium-duty regulator is perfect for most industrial cutting and welding applications, with easy-to-read 2" gauges, precise operation, a longer service life and a one-piece, encapsulated seat design with internal filter and PTFE Teflon® seat.

Handles and Cutting Attachments

When quality matters, using Harris makes the difference. Included in this program are both Harris-style and Victor-style handles and cutting attachments.

HOW THE PROGRAM WORKS

Premier Harris Products Group distributors are eligible to participate.

3% Discount

For participating distributors on the products included in this trade-in promotion (during the promotional window).

Distributors can decide whether to pass this savings onto customers.

Distributor sales contests with Harris prizes are available upon request.

WE GIVE YOU THE SUPPORT YOU NEED TO SUCCEED

Participating distributors will receive our marketing support package (one each per branch).
