

PLASMA CUTTING RANGE

INVERTEC® PC-210 • TOMAHAWK® 1025 • TOMAHAWK® 1538

LINCOLN®
ELECTRIC

CHOOSE LINCOLN FOR CLEAN, EFFICIENT AND COST-EFFECTIVE PLASMA CUTTING

Value for money

Cut through any conductive material in seconds.

Choose a model just right for your typical material thickness. Our plasma cutters are as good as the best in Class, with prices far below competitors (the machine as well as the consumable parts).

INVERTEC® PC-210 – portable, flexible cutting power up to 10 mm, powered from a standard 230V input supply, ideal for work on site.

TOMAHAWK® 1025 & 1538 – high performance plasma cutting machines, built to handle harsh environmental conditions, suitable for operation on site with a generator or within a workshop environment.

Up to 25 mm mild steel [Tomahawk® 1025] and up to 40 mm mild steel [Tomahawk® 1538].

ALL MACHINES

BUILT FOR THE HEAVIEST INDUSTRIAL CONDITIONS

Developed and tested under the hardest conditions (TRUE HD) to grant the reliability you need.

- PCB board made in Lincoln Electric Company
- Fully encapsulated and vertically mounted
- Capable of surviving the harshest testing conditions
- Varnished and potted electronic boards

PC-210

CUT PERFORMANCE – MILD STEEL
Hand Torch

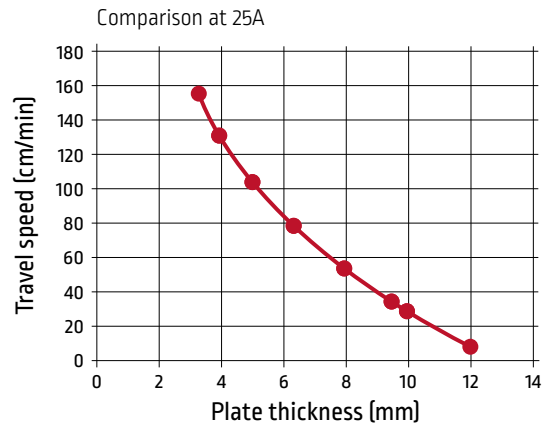

Recommended Maximum Severance

Rated Cut @ 0,47 m/min Maximum Cut @ 0,2 m/min Sever Cut @ 0,11 m/min

INVERTEC® PC-210

- Flexible: only 230 V input required.
- High performance: innovative advanced electrode and nozzle design.
- Robust: long life compressor.
- Portable: only 18,5 kg, small and compact.
- Different materials: mild steel, stainless steel, aluminium and many more.
- Concentrated plasma stream: less heat input, less distortion.
- Internal compressor or external.

PERFORMANCE

PC-210 external compressed air

PC-210 MOTOR GENERATOR COMPATIBILITY:

- minimum power 4kW
- Vac peak voltage: below 410V.
- RMS voltage of the AC waveform: 230Vac ± 10%.

TOMAHAWK® 1025 & 1538

- Starting: innovative advanced arc starting without HF.
- Performance: innovative advanced electrode and nozzle design.
- Longer lifetime: innovative advanced design increases lifetime of consumables.
- Faster: higher travel speeds and plate thickness.
- Flexible: multiple torch configurations.
- Different materials: mild steel, stainless steel, aluminium and many more.
- Concentrated plasma stream: less heat input, less distortion.
- Torch Connection – central connector, 9-pin.
- Step less current control.
- Remote kit (optional) that allows the unit to receive an external ON-OFF trigger for mechanized processes (only for TH1538)

MODERN TORCH TECHNOLOGY

LC65 and LC105

– the new torches with longer life time (running cooler). More cutting thickness, higher speed, standard and grid cutting.

- NO HF
- Small electrode diameter
- High air-flow
- High speed rotating air
- Primary and secondary flow
- Concentrated plasma
- Long life electrodes and nozzles
- Torch Connection – central connector, 9-pin

**ALSO AVAILABLE:
EXTENDED REACH
CONSUMABLES
HELPFUL FOR CONFINED
SPACES**

For connection equipment /torch the Tomahawk are provided by **CENTRAL CONNECTOR**

**HIGHER TRAVEL
SPEED AND
LONGER LIFE TIME
CONSUMABLES**

LC105 torch design with drag cup

Small diameter Electrode with "screw"

Air-flow through "diagonal" drilled holes in the direction of the "screw"

As a result high speed circular air flow around the electrode

Cooling

Primary Plasma beam in the middle. Secondary air stream with cold air concentrating the Plasma beam

Secondary air-stream cold
Plasma Beam hot

CONTACT	STAND-OFF	GOUGE
OPTION 1	OPTION 2	OPTION 3
Convenient for the operator, simply drag the nozzle on the plate. Well protected nozzle.	Maximum flexibility and visibility of the plasma stream.	Allowing you to gouge different materials.

GOUGING WITH TOMAHAWK® 1025 & 1538

Plasma gouging was developed as a tool for weld removal and weld preparation. Back-gouging was used to remove metal from the reverse side of arc-welded joints to eliminate defects and improve strength. Weld defects such as cracks, porosity, and lack of fusion could be gouged out using a plasma torch and then repaired with a new, sound weld.

TOMAHAWK 1025

Gouging application with manual plasma torch LC65

Material : Mild Steel
 Suggested speed : 90 cm/min
 Suggested torch inclination: 55° from vertical
 Suggested Air pressure : 4,0-4,5 bar
 Print on metal piece : 0,066 cm²
 Material removal capability : 6 cm³/min.

TOMAHAWK 1538

Gouging application with manual plasma torch LC105

Material : Mild Steel
 Suggested speed : 90 cm/min
 Suggested torch inclination: 55° from vertical
 Suggested Air pressure : 4,0-4,5 bar
 Print on metal piece : 0,111 cm²
 Material removal capability : 10 cm³/min.

CUSTOMER ASSISTANCE POLICY

The business of The Lincoln Electric Company® is manufacturing and selling high quality welding equipment, consumables, and cutting equipment. Our challenge is to meet the needs of our customers and to exceed their expectations. On occasion, purchasers may ask Lincoln Electric for information or advice about their use of our products. Our employees respond to inquiries to the best of their ability based on information provided to them by the customers and the knowledge they may have concerning the application. Our employees, however, are not in a position to verify the information provided or to evaluate the engineering requirements for the particular weldment. Accordingly, Lincoln Electric does not warrant or guarantee or assume any liability with respect to such information or advice. Moreover, the provision of such information or advice does not create, expand, or alter any warranty on our products. Any express or implied warranty that might arise from the information or advice, including any implied warranty of merchantability or any warranty of fitness for any customers' particular purpose is specifically disclaimed.

Lincoln Electric is a responsive manufacturer, but the selection and use of specific products sold by Lincoln Electric is solely within the control of, and remains the sole responsibility of the customer. Many variables beyond the control of Lincoln Electric affect the results obtained in applying these types of fabrication methods and service requirements.

Subject to Change – This information is accurate to the best of our knowledge at the time of printing. Please refer to www.lincolnelectric.eu for any updated information.
